PROJECT MANAGEMENT DOCUMENT

Your name: Ram Zallan	**Name of Project:** Causes and Histories of Web Trends

Driving Question:
How have the technologies of the web (HTML, CSS, JS) transformed since their conception, and how has that changed web design?
Description of a completed project:
I'll be turning in a website that shows how web design has changed since its beginnings due to new and updated web technologies. An "A" website would accurately show how things like new HTML versions, CSS and other web technologies have shaped web design, through various trends in popular web design. It will also tell a story, more than just "Click here to see websites in 1998!" to show the sites. For example, on the site showing how CSS added styling to websites, the actual content on the page may talk about the rise in popularity of styling websites.

Milestones:		
Week ending:	Milestone	Description
Jan 15, 2016	GitHub repository set up	Create a repository to host the site's code during Winter Break
	"Story" figured out	Figure out a means to show the websites without verbatim saying "Click here for a site" during Winter Break
	Revised PMD due Jan 14	Review PMD submitted pre-break and revise and update as necessary
Jan 22, 2016	**Proposed rubric submitted Jan 21**	Submit proposed grading rubric for feedback and approval
Jan 29, 2016	**Rubric approved by Jan 29**	Submit final approved rubric
Feb 5, 2016	Main page finished	Finish the preliminary design of the main page, which links to the specific sites.
	1991 site (Early WWW) finished	Finalize the "design" for a page that would be up at the very beginning of the Web.
Feb 12, 2016	1994 site (CSS introduced) finished	Finalize the design for a site made soon after CSS began being used
Feb 19, 2016	**Second Revised PMD due Feb 18**	
	1996 site (JS introduced) finished	Finalize the design for a site made when JavaScript began being used in sites
Feb 26, 2016	2000 site (Flash) finished	Finalize a design for a site made when Flash (and tables) were used almost exclusively.
Mar 4, 2016	2015 site finished	Finalize a design for a modern website, with new web technologies/languages

Mar 11, 2016	Mobile site finished	Finished a site (with a wrapped image of a phone) to show mobile web design
Mar 18, 2016	Future site finished	Finish a design to show where design trends may go in the future based on previous and current advancements
Mar 25, 2016	**[Spring Break]**	
	Design and code reviewed by web developer peers	Have my code and designs reviewed by web developers I know (through working together on various projects)
Apr 1, 2016	Implement final changes	Add any final changes to code or design based on feedback from peers and others
April 8, 2016	**Final Project Due April 8**	Turn in website, hosted either on my domain (i.e. ramzallan.me/web-trends) or on its own domain (i.e. webtrends.com)
